## Surface cleaning and preparation

### Frosted glass cleaning

Removing fat, soap, fingerprints and other residues from sandblasted and acid itched glass surfaces as preparation for following coating.

200,00 THB per m2

### Light duty cleaning

Removing of normal dirt and fat residues from glass and surface preparation for any following coating.

165,00 THB per m2

### Heavy duty cleaning

Removing of lime marks, chalk, oil, grease, wax, silicone, from glass and surface preparation for any following coating.

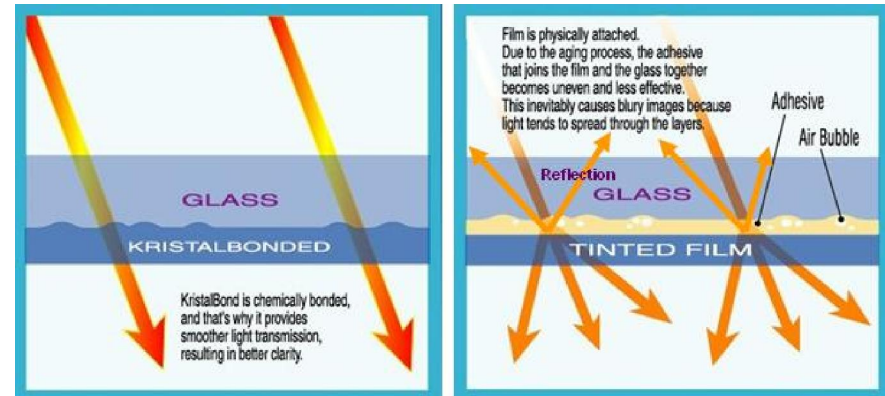

250,00 THB per m2

### After construction cleaning

Removing strong pollution, lime marks, chalk, oil, grease, wax, silicone, cement, from glass and surface preparation for any following coating after construction.

350,00 THB per m2

### Cost & Energy Saving

Sunlight harvesting, reduce air conditioner's load to minimize electricity bill

### Clearer View

Preserve the originality of the glass for excellent scenery view

### Comfort & Protection

Reduce heat for your comfort and improve indoor air quality & protects your family from the harmful UV rays

### Seamless Finishing

Seamless coating on large or curved glass surface

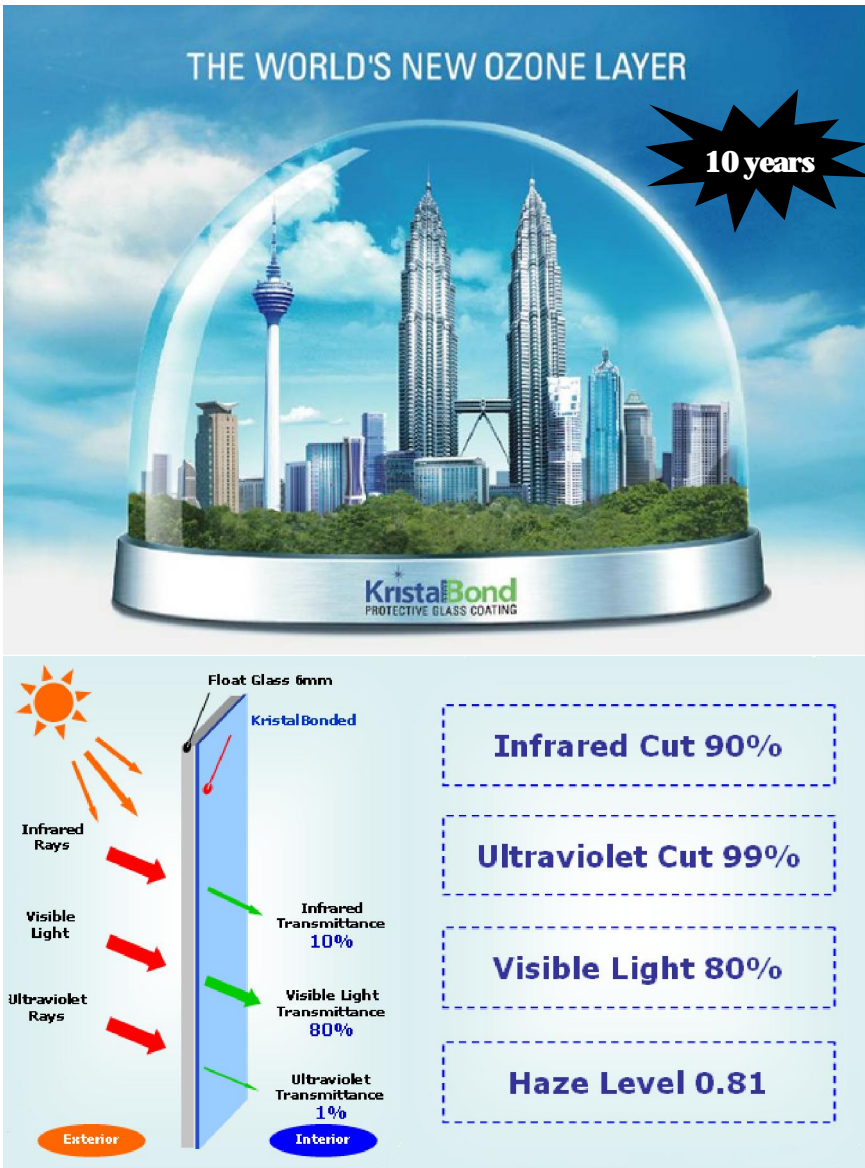

### Affordable Price

Value for money

Material **2,000.00 THB** per m2

Cleaning: From heavy duty referring to page 2

Application: **250 THB** per m2

## LOTUS hydrophobic glass coating

Water repellent—dirt reflecting—easy to clean .

The perfect solution for all interior glass, ceramic and mirror surfaces. Will reduce cleaning time up to 50%  
Can be maintained environmentally friendly with PH neutral cleaning solutions.

Material: **285.00 THB** per m<sup>2</sup>

Cleaning: Referring to page 2

Application: **50 THB** per m<sup>2</sup>

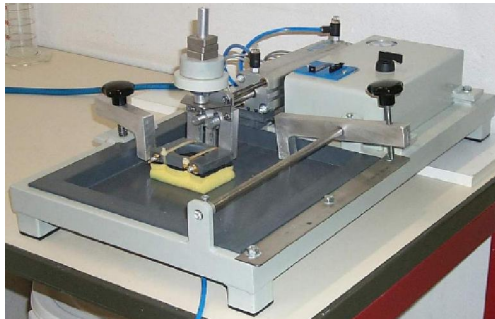

## Permanent super hydrophobic coating

**Product update  
2008**

**Tested with maximum durability**

**The German institute FGK tested the water repellent and easy to clean properties of this super coating and reported outstanding durability.**

Pressure on the test equipment 1KG	Effect reducing by using rubber lip	Effect reducing by using micro fiber
10,000 wipe cycles	-12%	-3%
100,000 wipe cycles	-40%	-15%

This means for example: If a hotel operator cleans a coated window on daily base by micro fiber with expected 3 wipes per section multiplied with 365 days per year— the coating will loose after 40 years not more than 15% efficiency. The full test-report can be requested on demand.

### **Water repellent — dirt reflecting — easy to clean.**

Your choice for long lasting protection of all exterior glass and surfaces with risk of strong pollution like shower stalls, frosted glass and kitchens.

Material: **450.00 THB** per m2

Cleaning: Referring to page 2

Application: **100,00 THB** per m2

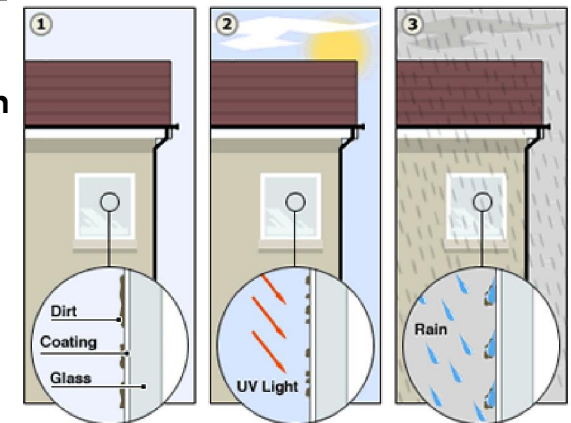

## Self cleaning photo catalytic coating

Before only known from manufacturers like Pilkington or Saint Gobain. Now first time available for after installation application on glass from any manufacturer.

**Let the rain wash  
your windows**

**or simply use a  
water hose**

Latest environmentally friendly coating technology with maximum cost saving benefits. The best solution for hotels, skyscrapers, skylights, and for all hard to reach glass surfaces.

Material: **650.00 THB** per m2

Cleaning: From heavy duty referring to page 2

Application: **100,00 THB** per m2
